 Can't describe the life of Queen Elizabeth I?
 Over 500 years ago
 In 1558 princess Elizabeth became Queen of England.
 People were shocked because they don't normally have a Queen and they think women can't rule.
 Elizabeth I thought she could be there in line to the throne.
 Elizabeth I had a problem because King Philip did not like her. In 1588 King Philip sent the Spanish Armada to kill England. Queen Elizabeth I said to her ships the word was the Spanish ships were sunk.
 Elizabeth I ruled over England nearly 45 years. England became rich and powerful, but she became Queen when her brother and sister died.
